Subject: Microsoft Settlement

I think one only needs to look at the states that are opposed to this settlement to understand that most of them are more concerned in protecting Microsoft's competitors than they are in protecting the general public. Utah and Mass. are prime examples of this!

Microsoft and other high technology companies have lead our economy for the past 9 years to new heights. Now that the economy is sluggish to say the least, let move on and let Microsoft lead again rather than wallowing around in this litigation hogwash we have seen for the past 2 years.

This is a fair settlement for all parties involved including the general public.

Regards
Terry Moore
